Mr. Fred Orrico
Ridgefield Golf Course Committee
Ridgefield, CT 06877

Dear Mr. Orrico,

At this time it appears that the cost of paving the road and parking area, complete with curbs, on top of a gravel base placed by others would be \$40,000 complete.

This figure is based upon what we now know in light of the current petroleum crisis.

The above figure is for fine grading and compaction of suitable gravel base material placed on the site in amounts sufficient to construct the base at the proper elevations. It must be understood that any additional gravel / stone required in connection with the fine grading would have to be an additional charge.

Thank you for this opportunity to provide you with these figures.

Very truly yours,

David R. Carroll
